

ZILDJIAN SHEET BRONZE

WHAT IS THE DIFFERENCE?

ZHT ALLOY: 88% COPPER, 12% TIN

ZXT, ZBT ALLOY: 92% COPPER, 8% TIN

Sheet Bronze cymbals begin as pre-formed discs cut from metal with uniform thickness. Precision hammering and shaping pummels cymbal discs, loosening the alloy's molecular structure and freeing up its distinctive tone. Sheet Bronze cymbals have a very fast response with a quick decay. They have excellent durability and a consistent sound within each respective model. Affordably priced, Sheet Bronze cymbals are an ideal first cymbal choice.

APPLICATIONS

SPECS

Hammering Combination of Cast and Sheet Bronze techniques. Chinas utilize random hammering

Lathing Fully lathed top & bottom

Finish All Traditional

AMPED UP ALLOY.

Our most expressive Sheet Bronze cymbals yet, ZHT breaks down the barriers of conventional sheet cymbals. A higher tin content, ultra-modern crafting techniques, and extensive hammering have created a more musical metal than previously found in Sheet Bronze cymbals.

GEN16

While electronic drums have been around for years, the Gen16 Acoustic Electric (AE) Cymbal System is a completely new instrument. Unlike most existing electronic percussion systems, the AE Cymbal is not a sample trigger device. Instead, it's an actual cymbal that can be struck with conventional sticks, mallets, and brushes or played in unconventional ways such as with fingers or cello bow. Each cymbal connects to the Digital Cymbal Processor (DCP) that supplies 20 preset sounds per cymbal, individual volume and pan controls, and more at reduced acoustic volume levels. Utilizing a patent-pending, dual microphone and Digital Sound Processor, the AE Cymbal System can be amplified to fill a concert hall or your own personal listening space.

ZILDJIAN DRUMSTICKS

Crafted to the same extraordinarily high standards as Zildjian cymbals, our sticks are weight sorted, tone paired, and guaranteed to be 100% straight. That's why so many of the world's greatest drummers, from Dennis Chambers to Tré Cool, have made Zildjian their stick of choice. We have also pioneered new technologies to achieve truly useful stick product innovations such as DIP® for improved grip, Anti-Vibe™ for patented vibration reduction, and Laminated Birch for increased density and power.

SOUNDING OFF

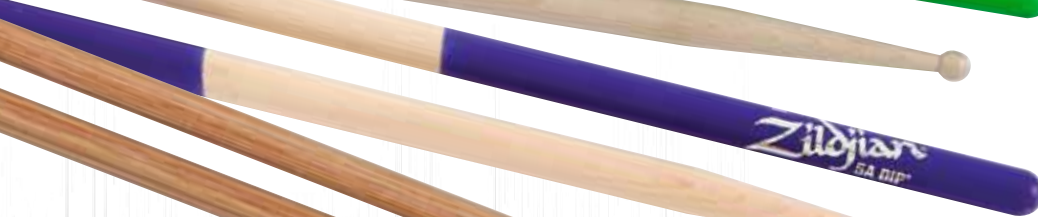

Dave Grohl Model (USA)
Designed for hard hitting Rock.

Travis Barker Model Blink-182 (USA)
From the mind of one of today's most influential drummers.

Trilok Gurtu Model Independent (IND)
Unique thumb groove and DIP® handle combine for a one-of-a-kind feel.

SOUNDING OFF

Gustavo Gimeno
Royal Concertgebouw Orchestra (NED)

"Playing Zildjian not only means tradition, but also the greatest quality. Zildjian is simply my first choice in cymbals."

Fernando A. Meza
University of Minnesota (USA)

"Zildjian plates have become an integral part of my teaching at the University of Minnesota. They help me deliver the message that quality sounds ARE attainable on cymbals, and my students really get to experience those sounds first hand."

Marching, Drum Corps, Concert Band, and Orchestral cymbals do not include straps and pads. These can be found in the Accessories and Cases section. Grommets are provided as standard on Stadium Series, Concert Stage Series, ZBT Band Pairs, and A Z-MAC pairs. Grommets are not standard on orchestral cymbals and we do not recommend using them with these cymbals as they affect the complete purity of tone of an orchestral cymbal. Orchestral and Band cymbals are available as singles.

Gongs	Finish	Size	Part #
12" Traditional Gong	T	12	P0512
12" Table-top Gong Stand	T	12	P0561
